No food containing artificial trans fat or partially-hydrogenated oils may be stored, distributed, served, or used in the preparation of any food within a food facility. Potentially hazardous foods in reduced oxygen packaging shall not exceed the "use by" date. Unpasteurized egg products are not to be used in foods such as Caesar salad dressing or hollandaise sauce. 20. CONSUMER ADVISORY PROVIDED FOR RAW OR UNDERCOOKED FOODS - MINOR

Inspector Comments:

The facility serves raw or undercooked food but a consumer advisory noting the significantly increased risk of consuming those foods by way of a disclosure and reminder using brochures, deli case or menu advisories, label statements, table tents, placards, or other effective written means was not observed at the time of the inspection.

Disclosure statement:

The disclosure statement is a written statement that clearly includes either a description of the animal-derived foods, such as "oysters on the half shell (raw oysters)," "raw-egg Caesar salad," and "hamburgers (can be cooked to order)" or by identifying the food marked by an asterisk to a footnote that states that the items are served raw or undercooked, or contain or may contain raw or undercooked ingredients.

The disclosure statement must inform the consumer that the food will not receive adequate heat treatment and that consuming creates a risk because the food may contain bacteria or other disease causing organisms that have been known to cause foodborne disease. The notification of the risk must be achieved by using a meaningful message in a manner that is likely to affect behavior and must be communicated so the consumer can consider the risks based on their health status and the food being consumed.

Reminder statement:

The reminder is denoted by an asterisk next to a raw or under cooked animal-derived menu item, to a footnote that includes either of the following disclosure statements:

- (1) Written information regarding the safety of these food items is available upon request; or
- (2) Consuming raw or undercooked meats, poultry, seafood, shellfish, or eggs may increase your risk of foodborne illness, especially if you have certain medical conditions.

Violation Description: Ready-to-eat food containing undercooked food or raw egg may be served if the facility notifies the consumer by disclosure and reminder. (114012, 114093)

- One egg casing on the floor below the drain board of the dish machine
- One live nymph at the gap between the metal wall covering and FRP paneling at the wall between the ice machine and dish area

Eliminate the infestation/activity of cockroaches/rodents/flies/vermin from the food facility by using only approved methods. Remove all evidence of the infestation and thoroughly clean and sanitize all affected surfaces. Construct, equip, maintain and operate the food facility so as to prevent the entrance and harborage of animals, birds and vermin including, but not limited to, rodents and insects.

Violation Description: Each food facility shall be kept free of insects, birds, animals, or vermin: rodents (rats, mice), cockroaches, flies. (114259, 114259.1, 114259.4, 114259.5)

 - c) as part of the cooking process
 - d) completely submerged under potable running water for a period not to exceed two hours at a water temperature of 70 F or below and with sufficient water velocity to agitate and flush off loose particles into the sink drain.
- Plan ahead as different methods of thawing could take additional time and effort.
