OPENING COMMENTS

This report supersedes the handwritten report left onsite on 1/18/2020.

Complaint ID#CO0072443

The purpose of this visit was in response to Control One call due to a grease interceptor sewage over flow.

Spoke to Andy at Santa Ana Public Works who was onsite prior to my arrival at the facility. He indicated that the private line that was backed up is the cause of sewage overflow flow from the building and food facility.

Upon arrival, fecal matter was observed on the ground in the back of the facility where the storm drain was located. The storm drain was observed to be barricaded by the city and sand bags were observed around it. Per Santa Ana Public Works nothing was observed going into the storm drain.

Spoke to Marcos, the owner who stated that the private line was jetted out yesterday.

1) Your Health Permit is suspended until a plumber receipt is provided indicating a clear line. Remove the fecal matter from the ground surface then clean and sanitize all the affected areas. Do not hose down to the drain.

2) Cease all food preparation and the use of water in the kitchen and restrooms until a representative at this Agency has authorized to reopen for business.

A CLOSED SEAL was issued.
