OPENING COMMENTS

This second reinspection was at the request of the PIC, B. Lagman after permit suspension on 6-25-20 for cockroach activity.

At this time no further evidence of cockroach activity was observed. All gaps noted on the report were sealed. Equipment was cleaned, however continued detail attention is required.

The permit is herewith reinstated.

A 3-week follow up inspection is scheduled to verify that cockroach activity is effectively eliminated.

Continue with approved pest control measures and monitor all areas of the facility for evidence of activity. Also continue to detail clean the facility on a regular basis.

The small reach-in cooler in the shake prep area was repaired and verified to be capable of holding at 41F. This unit may again be used for storage of potentially hazardous foods (PHF).
